

Extent of Existing and Potentially Recoverable Priority Habitats, Lower Columbia River Reach G.

- Notes:
- Priority habitats in this Reach include herbaceous tidal wetlands and herbaceous and forested uplands.
 - For the purpose of this analysis, 'recoverable' habitats include habitat types which could potentially be restored to a priority habitat type.
 - Results are based on the LCEP Historical Habitat Change Analysis (1870 - 2010).

Map Legend		Approx acres: Reach G
■	existing Priority Habitat (PH)	8,430
■	recoverable PH	6,100
■	PH lost to development	16,400
■	unknown/unclassified	
■	Area Not Analyzed	
□	Reach boundary
